SUMMARY

I am an experienced Java Developer with 4 years in designing and maintaining scalable backend systems. Proficient in technologies like Java, Kubernetes, and Spring Boot, I excel in optimizing system performance and collaborating in dynamic environments. I am passionate about coding, solving technical challenges, and delivering high-quality software solutions

EXPERIENCE

Technology Analyst

Infosys 05/2021 - Present Bengaluru

- Designed Backend systems with the Java Spring Boot framework, Microservices architecture
- Built and maintained secure RESTful APIs to enable seamless integration with frontend systems and other microservices for Inventory Management applications
- Worked on Backend system integrations with Cloud services like AWS S3, Azure Blob Storage, Kafka, and D365 platforms
- Provided optimized Database queries and operations using the Criteria API and Java Streams API, which improved modularity and application performance compared to legacy applications
- Packaged and containerized applications using Maven, Docker, Kubernetes, and HELM Charts for deploying in cloud environments like AWS EKS, ECS, Azure Containers, and RHEL
- Implemented SDKs and CLI tools in Python and enhanced Backend Applications based on the Django framework
- Maintained Software Development Life Cycle (SDLC) of several applications, including Spring boot, Django, and Databases like MariaDB, Kafka, GraphQL, Cassandra, and PostgreSQL
- Worked on optimizations for seamless deployment of Kubernetes resources (HELM) and SDKs for achieving single-touch automation, improving operations team efficiency by large margins
- Enhanced the Network Orchestration platform (ONAP) for Spark NZ Telecom to enable ease in deployment of SDNs such as VNF and CNF on private as well as public cloud

EDUCATION

Bachelor's of Technology in Electronics and Communications (ECE)

Raghu Institute of Technology

08/2016 - 06/2020 Visakhapatnam, Andhra Pradesh

CERTIFICATION

Certified Kubernetes Application Developer (CKAD) - 2024

Certification demonstrating proficiency in developing cloud-native applications with Kubernetes

KEY ACHIEVEMENTS

Infosys RISE Award 2024

Received recognition for innovation and contributions to multiple projects at Infosys

INSTA Awards 2022, 2023

Honored with awards for exceptional project impact and collaboration

SKILLS

Programming & DB

Java, Spring Boot, Python, Django, GO, SQL Server, PostgreSQL

Containerization

Docker, Kubernetes, HELM, Maven

Cloud

AWS, Azure, Openshift

Others

Shell Scripting, PL/SQL, GIT, Linux

PROJECTS

Kubernetes Dashboard [🔗](#)

Dashboard application for managing Kubernetes environments using Java, Spring, and Vaadin

Association Rule Mining using Python [🔗](#)

Data mining project focused on association rule learning

Stock Prediction Model [🔗](#)

Financial project focused on stock market predictions
